DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches a control device for controlling the charging voltage applied to a charging member and the transfer voltage applied to a transferring member; wherein the controlling portion changes the first transfer voltage to a second transfer voltage before a trailing edge of the recording material arrives at the transferring position and changes it to a third transfer voltage after the trailing edge of the recording material has passed the transferring position, changes the first charging voltage to a second charging voltage smaller than the first charging voltage when an area on the image bearing member to which the second transfer voltage has been applied passes the charging position, and wherein a difference between the second transfer voltage and the third transfer voltage is smaller than a difference between the second transfer voltage and the first transfer voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kato and Rakov et al discloses other controlling devices for
